➤ **Initiatives in teaching and learning process**

- **Methodologies to support weak students and encourage bright students (4)**

- Every individual is unique with different IQ levels. Some students have the capability of grabbing fast and memorize for long. Others have less picking capacity. We believe that in any school or college, both the active and weak students study.

1. **Individual teaching**

Many times, it has been observed that weak students are unable to understand a lesson correctly because he/she has failed to grasp the previous lesson.

2. **Encouragement**

Scolding and harsh punishment may discourage a weak student. He may get scared of sharing his problems. Therefore, we try to find a student's strength and utter encouraging words for him/her. Confidence is the keyword. It will make him/her feel his worth and importance.

3. **Timetable**

We make a proper timetable for the weak student. They make mistakes by not following the goal to study well and earn good grades. We help them in dividing the given time into various slots for completing each topic, revise and give exams. Doing the appropriate thing at the proper time can achieve the goal.

4. **Personal training through Student –Mentor Association**

It's quite evident that good students will do well. So, the teachers usually concentrate more on the healthy children in the class. But, one must look after the weak as well as they need personal preference from the tutors. Pleasant and polite behavior with individual care can boost the confidence and willpower, and the not so good students can come up with excellent grades in the future.

5. **Video clips**

- **Methodology to identify weak students:**
- Weaker students are identified based on their performance in continuous assessment tests like written test, Assessment, Quiz & MCQ.
- **Students securing less than 40% are identified as weaker students.**

▪ **Bright students are encouraged**

- Class activities like case study, group discussion & Quiz etc. are conducted to keep the bright students in class motivated. ...
- Creating awareness. Ongoing pharmaceutical activities in India/ around the world are communicated by circulating the clips from Pharma Biz (Indian Express) & showing video clips.
- Through student- Mentor Association & Meet their parents.
- Appreciation through financial support.
- Best outgoing student award
- Student of year award from each class
- Three top rankers from each class
